

SHASHANK JAIN

Data Scientist

☎ +91-7878921728 ✉ realshashankjain@gmail.com 🔗 [linkedin.com/shashankjain](https://www.linkedin.com/shashankjain) 🐙 github.com/shashankjain843

Summary

Aspiring Data Scientist with a strong foundation in Python, SQL and machine learning fundamentals. Hands-on experience through academic and personal projects involving data analysis, data visualization, and predictive modeling. Familiar with libraries such as Pandas, NumPy, Scikit-learn, and basic cloud technologies. Passionate about transforming data into actionable insights and continuously learning modern data science techniques.

Skills

Programming & Languages: Python, SQL

Machine & Deep Learning: Statistics, TensorFlow, PyTorch, Neural Networks, CNNs, RNNs, Scikit-learn

Data Visualization: Matplotlib, Seaborn, Power BI, Tableau

Data Wrangling and Cloud: Excel, Hadoop, GCP

Tools & Technologies: FastAPI, LangChain, RAG, Git, Jupyter Notebook

Soft Skills: Problem Solving, Communication, Teamwork

Experience

Data Analyst Intern

June 2026 – August 2026

Appic Software Development (On-Site)

Tools Used: Data Analytics, Python, Power BI

- Performed exploratory data analysis and preprocessing on 10,000+ rows using Pandas and NumPy.
- Applied data cleaning and transformation techniques improving dataset quality by 25%
- Created interactive Power BI dashboards for KPI tracking reducing manual reporting effort by 30%.

Projects

Sleep Pattern Detection and Dream Mood Prediction | *Python, Numpy, TensorFlow, XGBoost, Scikit-Learn*

- Built a CNN-LSTM model for sleep stage classification and an XGBoost classifier for dream mood prediction using EEG, ECG, and GSR signals.
- Developed a FastAPI backend with authentication, database storage, and Claude AI integration for personalized insights.
- Created an interactive Streamlit dashboard with real-time predictions and PDF report generation, deployed using Docker.

HR Salary Dashboard | *Python, Pandas, Scikit-Learn, Matplotlib, Streamlit*

- Cleaned and processed 200K+ payroll records, removing inconsistent entries to improve data quality and model accuracy.
- Built and compared 5 regression models, achieving 0.54 R^2 with Lasso Regression, and used GridSearchCV/RandomizedSearchCV to speed up tuning by 75%.
- Built an interactive Streamlit dashboard for real-time salary prediction, KPI tracking, and data visualization to support HR decision-making.

Awards & Certifications

- **TCSion HR Salary Dashboard Certificate – 2024:** Earned a certification in building end-to-end data pipelines, predictive salary modeling, and HR analytics dashboards.
- **Deloitte Data Analytics Certificate – 2025:** Built foundational skills in data analysis and business problem-solving through a hands-on certification program.
- **TCSion Statistics using R and Python Certificate – 2024:** Gained core expertise in statistical modeling, probability distributions, and data analysis using Python and R.

Education

Bachelor's Degree in Data Science Engineering

Graduated: 2026

Teerthanker Mahaveer University, Moradabad

CGPA: 8 / 10
